Hack4Impact - *Philadelphia City Controller's Office*

Hack4Impact is creating a website for the City Controller's Office of Philadelphia consisting of a searchable database of professional services contracts; a user interface for searching and sorting; the ability to download a CSV file of contracts; a landing page to link to contract search, lobbyist information, financial disclosure information, and campaign finance information; the ability to submit fraud requests to the City Controller; and the ability for admins to manage the database, including upload of contract CSV files. The agreed upon delivery date for these items is June 30, 2020 (end of FY).
